Professional Summary

Information Technology graduate from the University of Bahrain with hands-on full-stack development experience from industrial training at Script Solutions. Built and tested web applications using Laravel, Next.js, TypeScript, PostgreSQL, Docker, and AI APIs. Comfortable working across front-end, back-end, databases, version control, debugging, and deployment workflows.

Experience

Script Solutions | Industrial Training - Full-Stack Development

Jul 2026 - Aug 2026

- Completed industrial training in the Software Development department, contributing to full-stack web systems from development and database work through testing and deployment preparation.
- Worked with Laravel, Next.js, TypeScript, PostgreSQL, Docker, Git/GitHub, AI API integration, and local speech-to-text/text-to-speech modules.

Experience Projects

QLM | Educational SaaS Platform

Full-Stack

- Built a multi-role school management SaaS covering admin, teacher, and student workflows, including courses, assignments, quizzes, grades, attendance, roles/permissions, and academic-year processes. Tech: Laravel, Blade, Tailwind CSS, PostgreSQL, Docker, Git/GitHub.

Wordia | AI Website Builder

Full-Stack

- Developed an AI-powered website builder that helps users create websites through AI-assisted workflows. Worked on the Next.js/TypeScript application, PostgreSQL data layer, AI API integration, Docker environment, and front-end/back-end development.

Mkateeb | Bookstore Management Platform

Full-Stack

- Developing a production-ready bookstore management platform for Bahrain covering online shopping, owner administration, physical-store POS, inventory, orders, book requests, suppliers and purchasing, delivery/pickup, reviews, notifications, reports, invoices, and imports/exports. Backend stack: Next.js App Router, TypeScript, PostgreSQL, Prisma ORM, Zod, and automated testing.

Education

University of Bahrain

Graduated 2026

Diploma in Information Technology
